**C**                                      **D**  
 So, so you think you can tell,  
                                          **Am**                                      **G**  
 Heaven from Hell, blue skys from pain.  
                                          **D**                                      **C**  
 Can you tell a green field from a cold steel rail,  
                                          **Am**  
 A smile from a veil,  
                                          **G**  
 Do you think you can tell?

**C**                                      **D**  
 And did they get you to trade your heroes for ghosts,  
                                          **Am**                                      **G**  
 Hot ashes for trees, hot air for a cool breeze,  
                                          **D**  
 Cold comfort for change,  
                                          **C**                                      **Am**  
 And did you exchange a walk on part in the war  
                                          **G**  
 For a lead role in a cage?

## Interlude: (TAB if you can)

**Em G Em G Em A Em A G**

**C**                                      **D**  
 How I wish, how I wish you were here.  
                                          **Am**  
 We're just two lost souls swimming in a fish bowl,  
**G**  
 Year after year,  
**D**                                      **C**  
 Running over the same old ground. What have we found?  
                                          **Am**                                      **G**  
 The same old fears. Wish you were here!

**Outro: (TAB if you can)    Em G Em G    Em A Em A    G**
